Felled timber shall be utilized to the highest merchantable standards. All sawtimber and pulpwood trees scheduled for removal have been cruised.

The following volumes are only estimates and not guaranteed. Each bidder is encouraged to use their own cruise data to compute bids. Topwood has not been included in these figures. This table represents estimated removals of 68.9 acres of pine thinning ONLY.

All sawtimber and pulpwood trees scheduled for removal have been cruised. To improve post-harvest wildlife, scattered standing dead trees should be left in the final harvest area when safe to do so. The Department reserves all rights to cone and/or seed collection from the tops of marked or cut trees.

Total bid to be considered	=	\$220,175.50

Deposits are no longer required with a timber sale bid. Only the winning bidder will be required to submit a deposit. A **two thousand five hundred dollar (\$2,500)** deposit will be required when the signed contracts are returned along with the down payment for the timber sale. The deposit must be in the form of a check made payable to the **Department of Forestry**. The deposit will serve as a performance bond and be retained until satisfactory conclusion of the contract, at which time it will be released.

The high bidder will be required to make a lump sum payment for the timber offered for sale on the 65.4 acre final harvest (Stand 04-007) and a **down payment of \$12,000** within ten (10) days of the bid date for the 68.9 acre pine thinning (Stand 04-008). The down payment for the pine thinning will be held by the department through the majority of the sale until the expected value of the remaining timber to be harvested is equal to the amount of the pine thinning down payment. Payments for purchased timber shall be on the basis of actual volume removed from the thinning area as evidenced by individual load tickets, mill tickets, or similar documentation. Volume documentation and stumpage checks will be submitted to the State Forest on a weekly basis throughout the entirety of the thinning harvest. Stumpage payments will be paid in full weekly to **"Department of Forestry"** and submitted to the State Forest until the down payment is applied. The down payment will be applied as a stumpage payment near the end of harvesting operations when the expected remaining stumpage value is equal to the amount of the down payment. In the event the down payment exceeds the remaining stumpage balance, a refund will be issued to the buyer. In the event the down payment is less than the remaining stumpage value, the buyer will continue weekly stumpage payments and load documentation until the full balance is received.

Full particulars, including proposal form and sample contract, may be secured from the Virginia Department of Forestry, Randy Kyner, Assistant State Forest Superintendent, or from Kirby Woolfolk, Forest Manager, 751 Oak Hill Road, Cumberland, VA 23040 (434-995-8096).

 - (d) During and upon completion of the harvest operation, the Purchaser shall comply with the Water Quality and BMP standards listed in the "Virginia's Forestry Best Management Practices for Water Quality, Fifth Edition" issued by the Virginia Department of Forestry. The Department reserves specifically the right to request corrective action of the Purchaser in maintenance and stabilization of forest roads, trails, culvert pipes, water bars, side ditches, lead-off ditches, decks, skid trails and streams where destructive action of the Purchaser has contributed to a BMP or Water Quality problem.
 - (e) *The purchaser shall comply with all Virginia Department of Transportation regulations and obtain all required permits for temporary logging entrances.* The Purchaser shall guard against the unnecessary transfer of mud and debris by vehicle onto the public highway system of the Commonwealth of Virginia, whereby the same poses a

threat to public safety. Furthermore, the Purchaser assumes the responsibilities for the preventive and/or corrective action necessary to eliminate this source of hazard should the problem develop.

- (f) The Purchaser will assume the responsibility for stabilizing against erosion on used forest roads and trails according to the Water Quality BMP Handbook.
- (3) The location of any landings, logging deck areas, and stream crossings will be approved by the Department prior to development.
 - (a) The Purchaser and the Department shall mutually lay out decking locations and size of the decking areas. Excessive scalping of the decking area is not permitted. The threshold for the term "excessive" will be determined by the acting forest manager.
- (4) All logging operators on State Forest lands must be trained and certified under their respective state's professional logger program, such as Virginia's SHARP Logger Program.
- (5) The Purchaser agrees to exercise the utmost care and caution to prevent the inception and spread of forest fires on the area for sale and on adjoining areas. The Purchaser further agrees to observe and comply with all the forest fire laws of the State of Virginia which may be applicable. The Purchaser will be held liable for costs associated with controlling any fire caused by the harvest operation or for fire damage to residual trees and adjacent forest stands.

ARTICLE IV

- (1) The Department reserves the right to postpone timber removal under terms of this contract for gross noncompliance with the agreed upon provisions herein, to the extent, however, that in case of dispute over the terms of this agreement, the Department and the Purchaser agree to accept the decision of an arbitration board of three selected persons. Each of the contracting persons will select one person and the two selected will select a third to form this board. In the event a satisfactory decision is not reached, appeal to the local Circuit Court is available.
